## SUMMARY

Data Analyst with 3 years of experience in user growth and conversion optimization, skilled in Python, SQL, and Tableau. Built automated dashboards that reduced reporting time by 87.5% and designed an RFM model covering 5 million users, achieving a 5.2% conversion lift. Holds a B.A. in Economics from Fudan University and JLPT N2 certification.

## EXPERIENCE

### Data Analyst — Hangzhou E-commerce Group 2024.07 – 2026.06

- Analyzed repurchase rates and user segmentation, designing an RFM model covering 5 million users
- Led conversion rate optimization experiments, boosting landing page conversion by 5.2%

### Data Analyst Intern — Shanghai Yunshu Tech Co., Ltd. 2023.07 – 2023.09

- Built weekly user growth reports covering core metrics (DAU, retention, conversion), ensuring data accuracy and timely delivery
- Automated reporting dashboards, reducing report production time from 4 hours to 30 minutes per week
- Supported A/B experiment analysis, delivering 12 experiment reports that informed product decisions

## EDUCATION

### Fudan University — B.A. in Economics 2020.09 – 2024.06

GPA: 3.6/4.0; 校级奖学金 (2022)

## SKILLS

- Technical:** Python (pandas / matplotlib), SQL (MySQL / Hive), Tableau, Excel
- Languages:** Japanese (N2), English (CET-6)
- Certifications:** JLPT N2 (2023.12)
